

LTB Güntert & Kohlmetz GmbH Industriestr. 40 76646 Bruchsal - Deutschland	Technical Note No. 397/1 for Swift S-1	Page 1 of 1
---	---	-------------

Subject: Canopy guiding device equivalent to a so called „Rögerhaken“

Affected: All „Swift S-1“

Urgency: When registering the glider in Germany
Optional for all other „Swift S-1“.

Reason: A retrofitable canopy guiding device has been developed, which accomplishes the same task as the so called „Rögerhaken“.

With such a device the canopy will rotate around its rear point when opened with the canopy emergency release. Without such a device the canopy may separate from the glider in an uncontrolled manner and may hit the pilot.

Actions: Installation of the canopy guiding device according to the working instructions for TN 397/1.

Material: Working instruction for TN 397/1
Other materials see working instruction

Mass (weight) and balance: negligible influence

Remarks: The canopy guiding device can be installed either by the manufacturer or by a technical aviation service station holding an appropriate license and must be inspected and entered in the log book and the aircraft inspection documents by a licensed aviation inspector.

Bruchsal,
26th September 2003

LTB Güntert & Kohlmetz GmbH
